

KEEPS ON DRILLING WHEN OTHERS GIVE UP

HEAVY DUTY WEAR BEND

THERE'S A REASON IT'S CALLED A HEAVY DUTY WEAR BEND. THE HARLSAN WEAR BEND IS DESIGNED FOR RUGGED EFFICIENCY & HAS PROVEN OVER THE YEARS TO OUTPERFORM OTHER WEAR BENDS & DEFLECTOR BOXES IN ABRASIVE RC DRILLING CONDITIONS.

HARLSAN WEAR BEND

The Harlsan Heavy Duty Wear Bend is tough and robust, and designed to support field maintenance. The main replaceable part is the long life wear plate, which is optionally supplied in hard faced bisalloy or tungsten carbide. Additionally a replaceable tungsten carbide discharge insert increases the serviceable life of the Wear Bend. You can combine the Harlsan Wear Bend, Blow Down, and Bearing Swivel for a complete Harlsan above the head package.

HARLSAN PARTS AND SERVICE

The Harlsan Wear Bend is designed to make changing the wear plate & discharge inlet as simple as possible. With our customer support systems and renowned service the parts you need are just a phone call away.

KEY FEATURES AND BENEFITS

- **Wear plate options** - Hard faced bisalloy or tungsten carbide wear plate/block available to best suit your drilling conditions
- **Wear Bend inlet and outlet** manufactured from premium quality European hardened 4140 grade alloy steel for superior wear resistance
- **Designed** to make field maintenance simple, minimising down-time.
- **Lifting point** for ease of handling & installation
- **Harlsan parts & service** are just a phone call away

“WE HAVE BEEN USING HARLSAN HEAVY DUTY WEAR BENDS ON OUR RC DRILLING RIGS FOR YEARS. THEY ARE LONG WEARING & THE ROBUST, EFFICIENT DESIGN MAKES THEM EASY TO USE AND MAINTAIN IN THE FIELD”

Gus Lacey
Managing Director
Raglan Drilling

TECHNICAL SPECIFICATIONS

Inlet and Outlet Size: Standard in 4" and 4 ½" with thread types, hose tails and adaptors available to suit your rig
