

HARLSAN INLET SWIVELS

Harlsan manufactures a full range of swivels for reverse circulation drilling. Harlsan top inlet, bottom inlet & bearing swivels are backed by a full range of parts & service kits designed to keep you drilling.

If your RC rig needs a Top Inlet, Bottom Inlet or Bearing Swivel then talk to Harlsan. Our Swivels are designed to handle high air pressure and customer feedback is that they consistently go longer between reseals. We supply Inlet Swivels, Top or Bottom, to suit 3" through to 4½" drill string.

KEY FEATURES AND BENEFITS

- A range of Top Inlet, Bottom Inlet and Bearing Swivels
- Adapter flanges & plates to suit your rig
- Full range of parts for in the field servicing
- Harlsan in-house rebuilds available
- Reduced downtime means you drill more metres every day
